

Final Report for Team: Carpe-Datum-2022

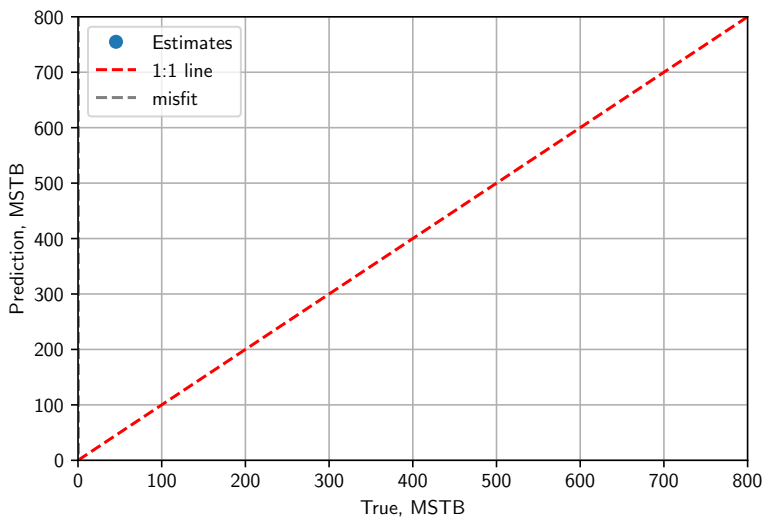

Figure 1: Accuracy.

Fig 1 shows your team’s predictions compared to the actual production values at 2 years. The mean absolute percentage error with respect to the true values is 958604.13547. The total field production for your well locations is 34988789.595.

Presentation comments

- demonstrated solid workflow + robust validation pipeline
- nan
- Good Viz of the data Good leverage of different imputation techniques Good sanity check with the imputations
Good validation pipeline Good emphasis on understanding the results.
- Good problem setup. Clean visuals. Excellent presentation overall. Going over model iterations in particular was well done.
