

Final Report for Team: Foster

Figure 1: Accuracy.

Fig 1 shows your team's predictions compared to the normalized fuel consumption values. The mean absolute percentage error with respect to the true values is 0.137. Each fuel type is normalized independently such that its max/min values are scaled to the interval $(0, 1)$

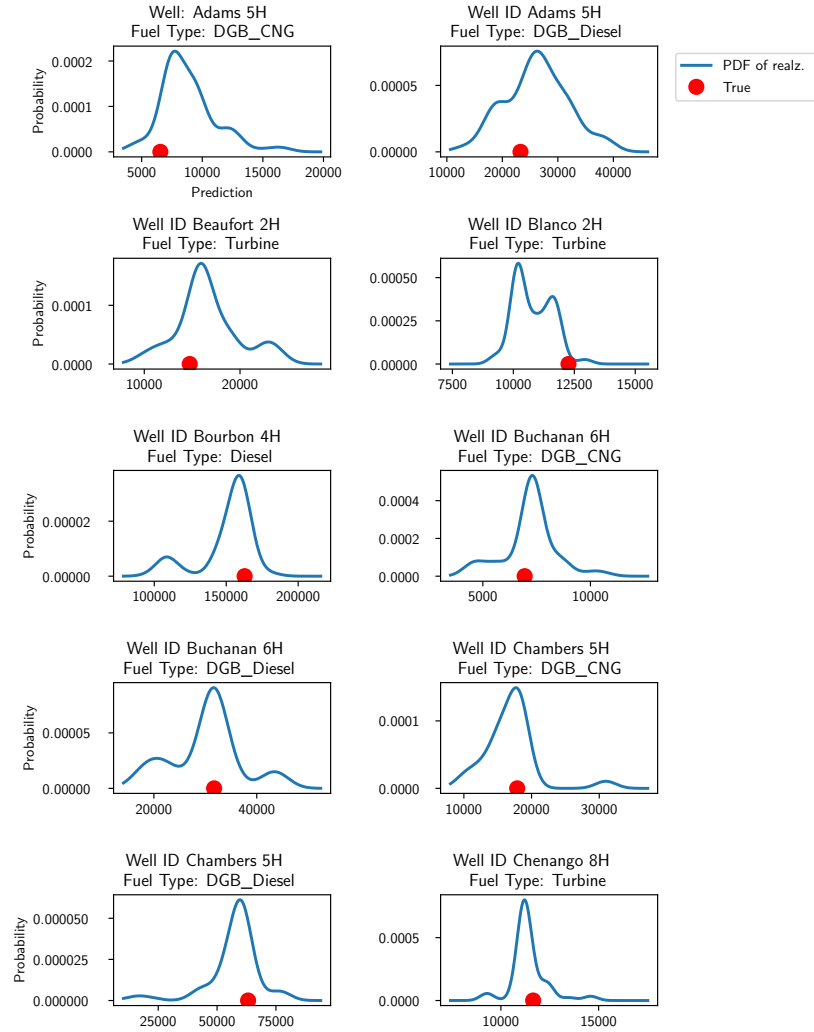

Figure 2: Uncertainty distributions and true values.

Fig 3 shows your team's uncertainty model and actual values for 10 of the predictions.

Figure 3: Goodness Score Plot.

Fig 3 shows your team's goodness score plot for the 50 wells. Your final goodness score is 0.9182327513227512.

Presentation comments

- A lot of good description - we ran out of time, wanted to know more about where you finalized your model selection. Wanted to hear from all team members.
- nan
- Very minimalist on slides, executive summary too simple
- Good triangulation of methods to confirm feature selection.
- Two speakers did most of the talking
- only 2 guys spoke - all other team was quiet

Code review comments

- nan
- Good visualizations
- Missing executive summary
