

Final Report for Team: Boolean Hooligans

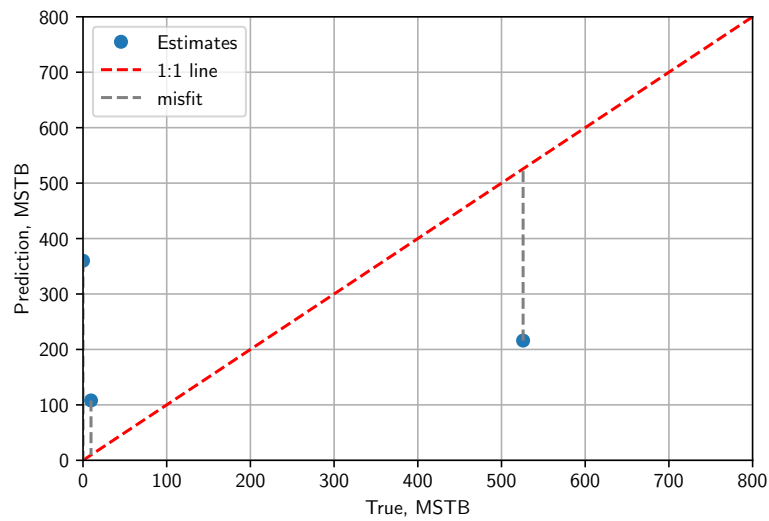

Figure 1: Accuracy.

Fig 1 shows your team's predictions compared to the actual production values at 2 years. The mean absolute percentage error with respect to the true values is 120003.29046. The total field production for your well locations is 35411251.155.

Presentation comments

- nan
- nan
- Good presentation. Model assumptions and iterations presented clearly. Great post modern story title!
- Good presentation. Next time, More coordination between who presents what.
