

Final Report for Team: OrkaHackers

Figure 1: Accuracy.

Fig 1 shows your team's predictions compared to the normalized fuel consumption values. The mean absolute percentage error with respect to the true values is 0.194. Each fuel type is normalized independently such that its max/min values are scaled to the interval $(0, 1)$

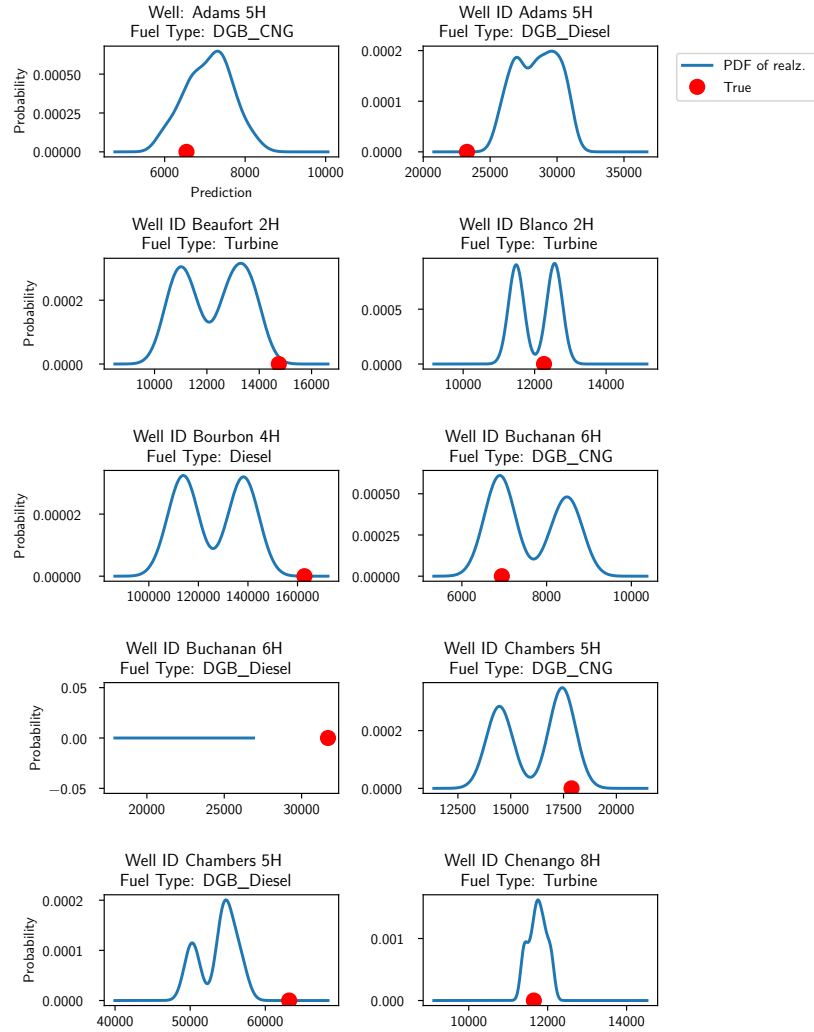

Figure 2: Uncertainty distributions and true values.

Fig 3 shows your team's uncertainty model and actual values for 10 of the predictions.

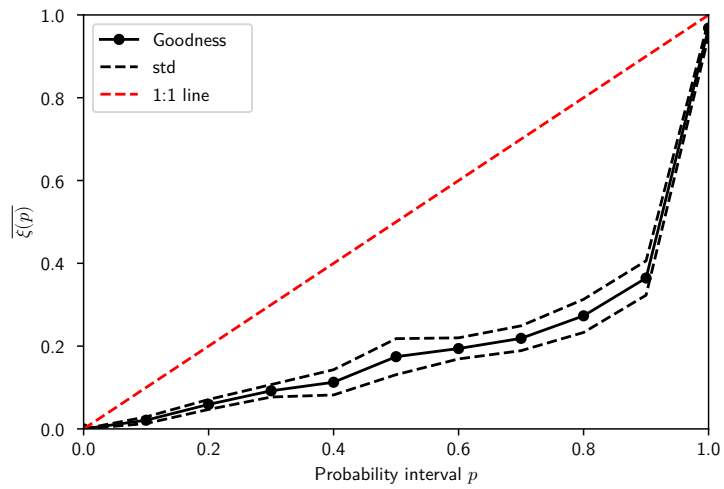

Figure 3: Goodness Score Plot.

Fig 3 shows your team's goodness score plot for the 50 wells. Your final goodness score is 0.37.

Presentation comments

- nan
- nan
- Good summary in conclusions. Good suggestions.
- KNN imputation was good. Seemed like predictiveness lagged other groups.
- nan
- Workflow visual good but difficult to follow along as presenter was going too quickly. It is evident via presentation that all team members participated strongly. Best practices/feedback good. Finished just under 5 minutes
