

Final Report for Team: gufunc

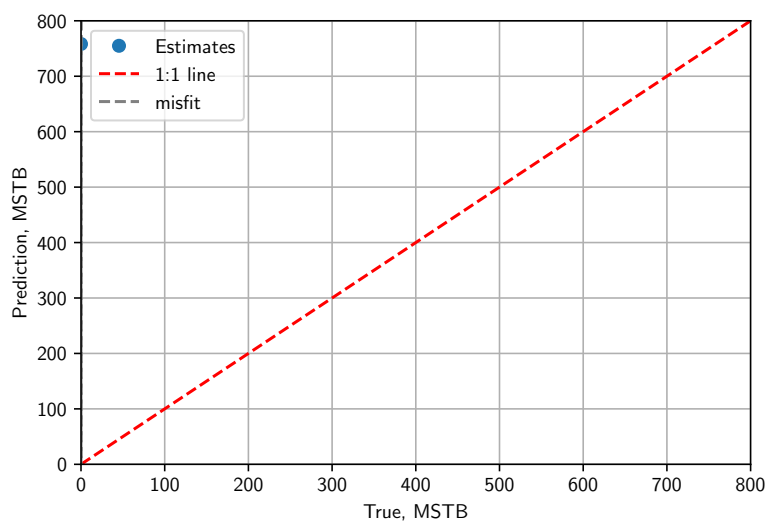

Figure 1: Accuracy.

Fig 1 shows your team's predictions compared to the actual production values at 2 years. The mean absolute percentage error with respect to the true values is 1115442.33333. The total field production for your well locations is 34988789.595.

Presentation comments

- Good future work
- Very clear presentation. More explanation of cleaning/imputation. Good focus on results and sanity checks. Good summary of learnings.
- Great workflow overview. Clean visuals. Clear presentation of results and placement.
