

Final Report for Team: darcy-analytics-2022

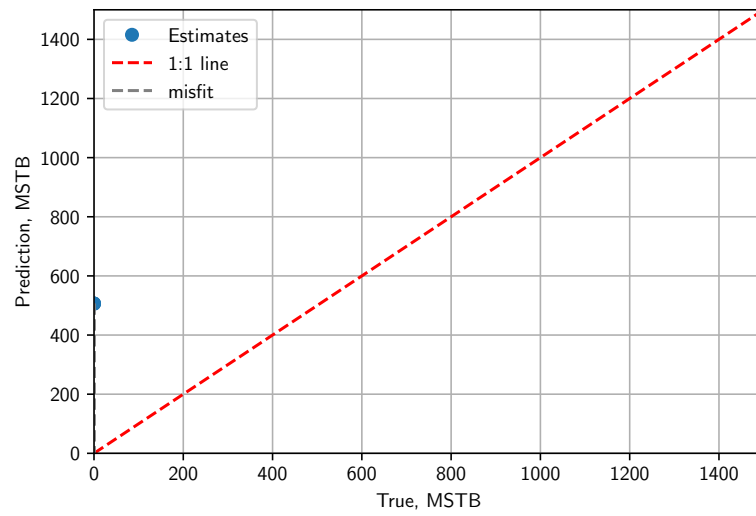

Figure 1: Accuracy.

Fig 1 shows your team's predictions compared to the actual production values at 2 years. The mean absolute percentage error with respect to the true values is 506421.26377. The total field production for your well locations is 34988789.595.

Presentation comments

- Interesting physics based motivation
- nan
- Crisp summary. Interesting physics based approach.
- Great inclusion of physics data and the explanation of how to fix the data.
