

## Final Report for Team: Fourier Mirage

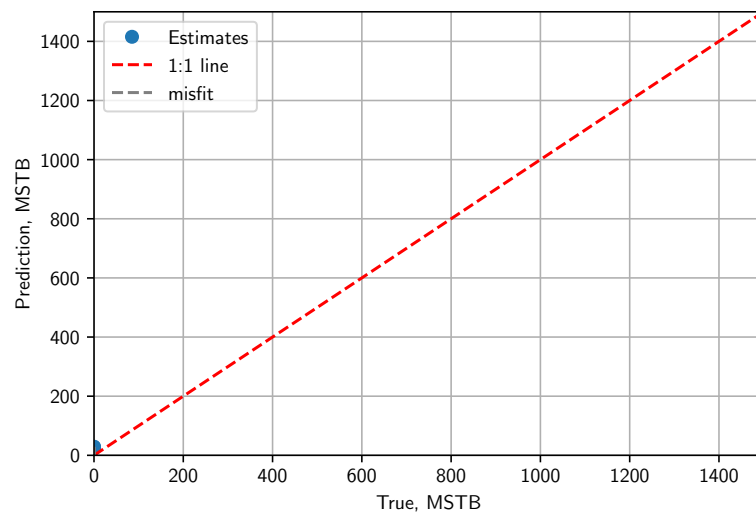

Figure 1: Accuracy.

Fig 1 shows your team's predictions compared to the actual production values at 2 years. The mean absolute percentage error with respect to the true values is 26901.0. The total field production for your well locations is 34988789.595.

## Presentation comments

- nan
- Good collaboration
- Good job explaining the steps of the workflow (and using domain knowledge in feature selection is standard practice).
- More explanation of imputations.

## Code review comments
