

Final Report for Team: CodeNotFound404

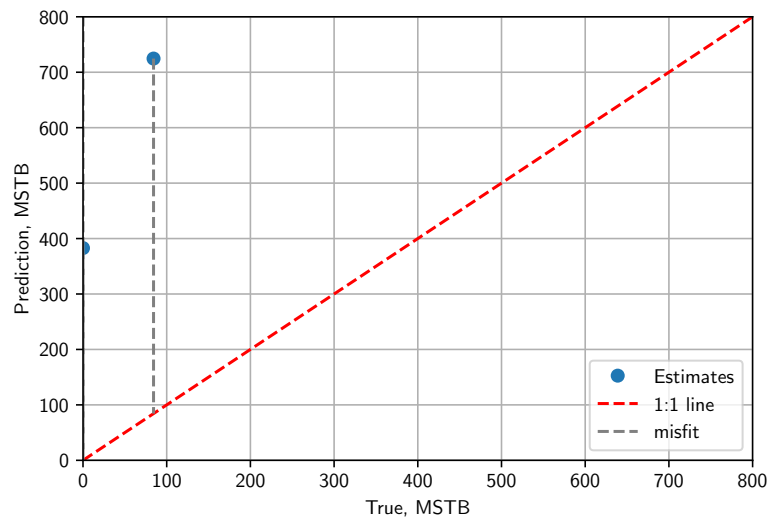

Figure 1: Accuracy.

Fig 1 shows your team's predictions compared to the actual production values at 2 years. The mean absolute percentage error with respect to the true values is 446080.86585. The total field production for your well locations is 35060332.055.

Presentation comments

- Fewer team members (2), but nicely done
- Good explanation of data analysis and feature extraction. Great job for a team of 2!
- nan
- Good explanations of pitfalls and how you handled them. Good charts, and explanations.
Need summary of learnings
