

## Final Report for Team: Bayesian

Figure 1: Accuracy.

Fig 1 shows your team's predictions compared to the normalized fuel consumption values. The mean absolute percentage error with respect to the true values is 0.127. Each fuel type is normalized independently such that its max/min values are scaled to the interval  $(0, 1)$

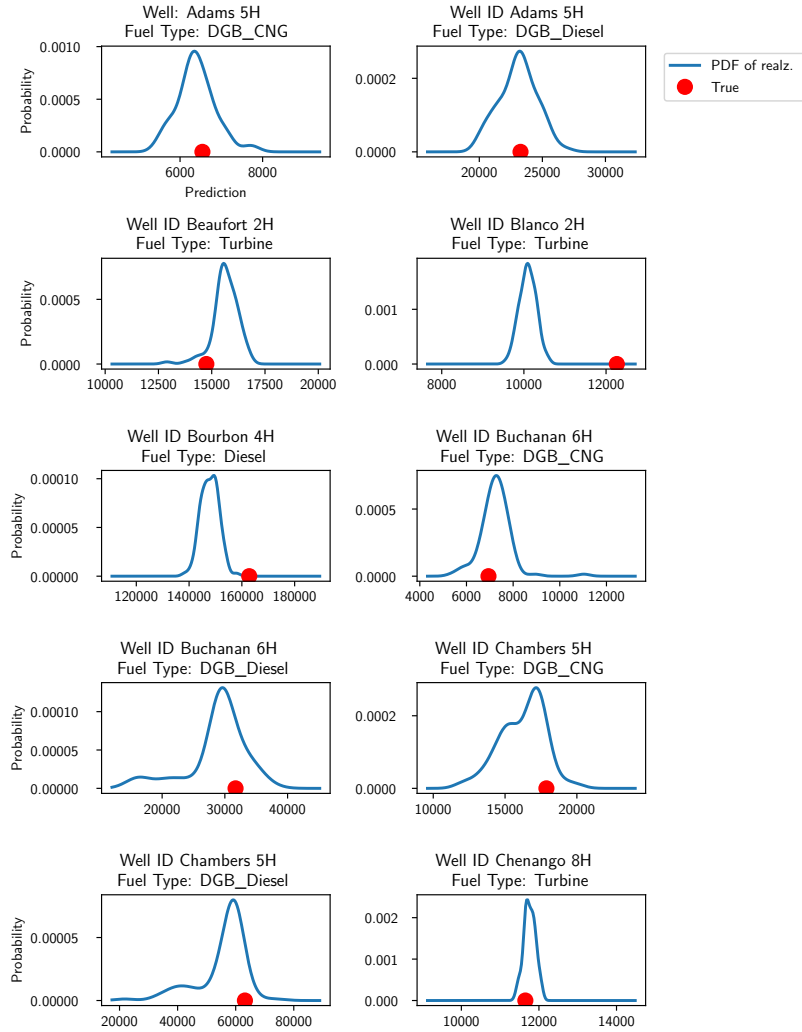

Figure 2: Uncertainty distributions and true values.

Fig 3 shows your team's uncertainty model and actual values for 10 of the predictions.

Figure 3: Goodness Score Plot.

Fig 3 shows your team's goodness score plot for the 50 wells. Your final goodness score is 0.565.

## Presentation comments

- nan
- You didn't introduce your team
- nan
- nan
- Executive summary clear and concise. Explanation of decision-making process helps making understanding their conclusions easier. Made a conscious effort to have all team members present.
- Was clear of the work

## Code review comments
