

Final Report for Team: Sphere

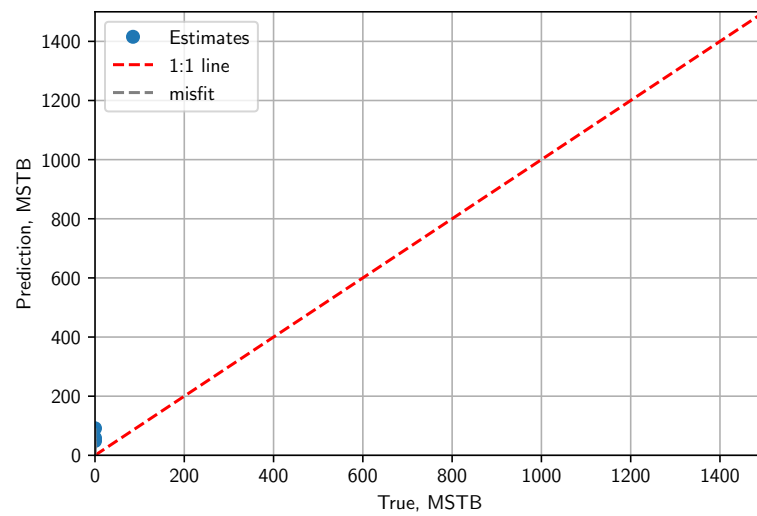

Figure 1: Accuracy.

Fig 1 shows your team's predictions compared to the actual production values at 2 years. The mean absolute percentage error with respect to the true values is 66134.80732. The total field production for your well locations is 34988789.595.

Presentation comments

- Clean executive summary. Good clarity in visuals.
- Good presentation of just displaying the data and the decisions made as a result of viz. Explanations for physics based reasons and correlation matrix for including in calculations were good. Great work!
