

## Final Report for Team: Data Derricks

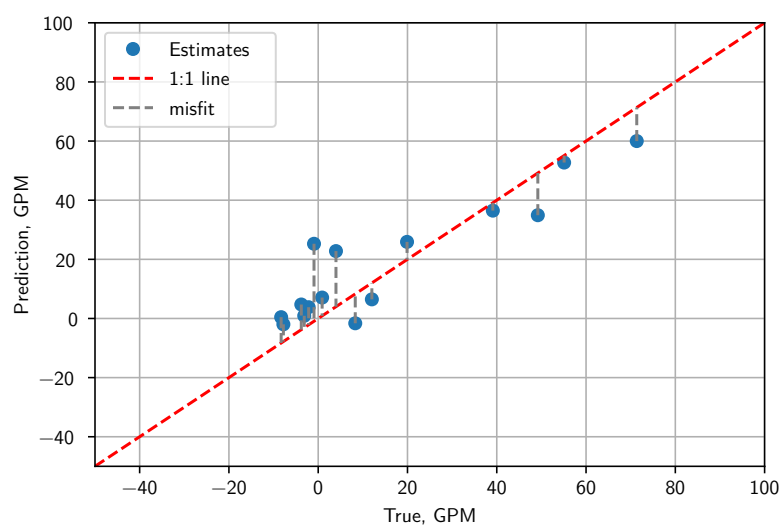

Figure 1: Accuracy.

Fig 1 shows your team's predictions compared to the actual pump difference. The total mean squared error with respect to the true values is 121.637.

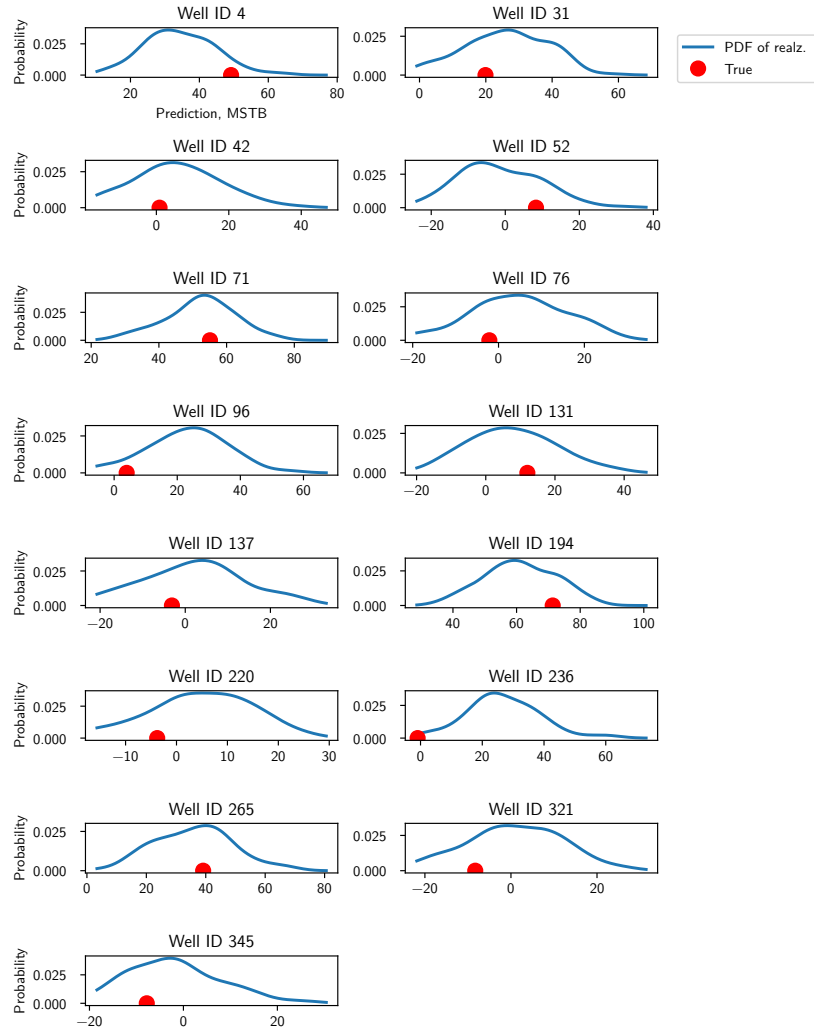

Figure 2: Uncertainty distributions and true values.

Fig 3 shows your team's uncertainty model and actual pump differences for the 15 wells.

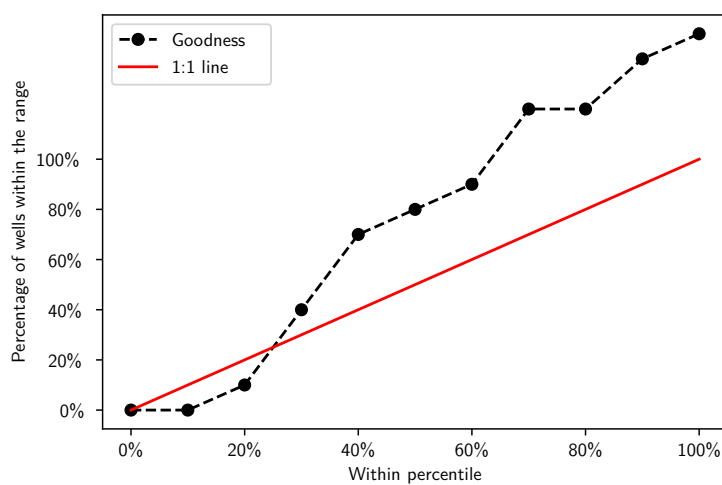

Figure 3: Goodness Score Plot.

Fig 3 shows your team's goodness score plot for the 15 wells. Your final goodness score is 0.641.

## Presentation comments

- Great way to describe what the model could be with more data. Really like the tie of results to cost/safety in your closing statement!!!!
- nan
- Better exec summ although a little harder to read, well presented and explained, good recommendation
- Don't skip the appendices!
- Made a business recommendation at the end. Utilized the model! Good explanation of results and feature selection
- presentation was convincinng and information very clearly

## Code review comments
