## Final Report for Team: Underdogs

Using the following scoring metric

$$score = 2\left(accuracy - \frac{1}{2}\right)$$

Your teams score was -0.0500000000000000044.

## Presentation comments

- nan
- nan
- Good workflow diagram. Good explanation of k nearest neighbors and iterative imputer. Interesting choice to determine which features to select.
- nan
- Good job presenting features + visualization
