# Final Report for Team: MMVS

Figure 1: Accuracy.

Fig 1 shows your team's predictions compared to the actual production values at 2 years. The mean absolute percentage error with respect to the true values is 552365.33333. The total field production for your well locations is 34988789.595.

Presentation comments

- nan

- Good plots Spend more time on explanation of final model.

- Great job presenting feature selection. Clean visuals.
