# Final Report for Team: deepblue

Figure 1: Accuracy.

Fig 1 shows your team's predictions compared to the normalized fuel consumption values. The mean absolute percentage error with respect to the true values is 0.489. Each fuel type is normalized independently such that its max/min values are scaled to the interval $(0, 1)$
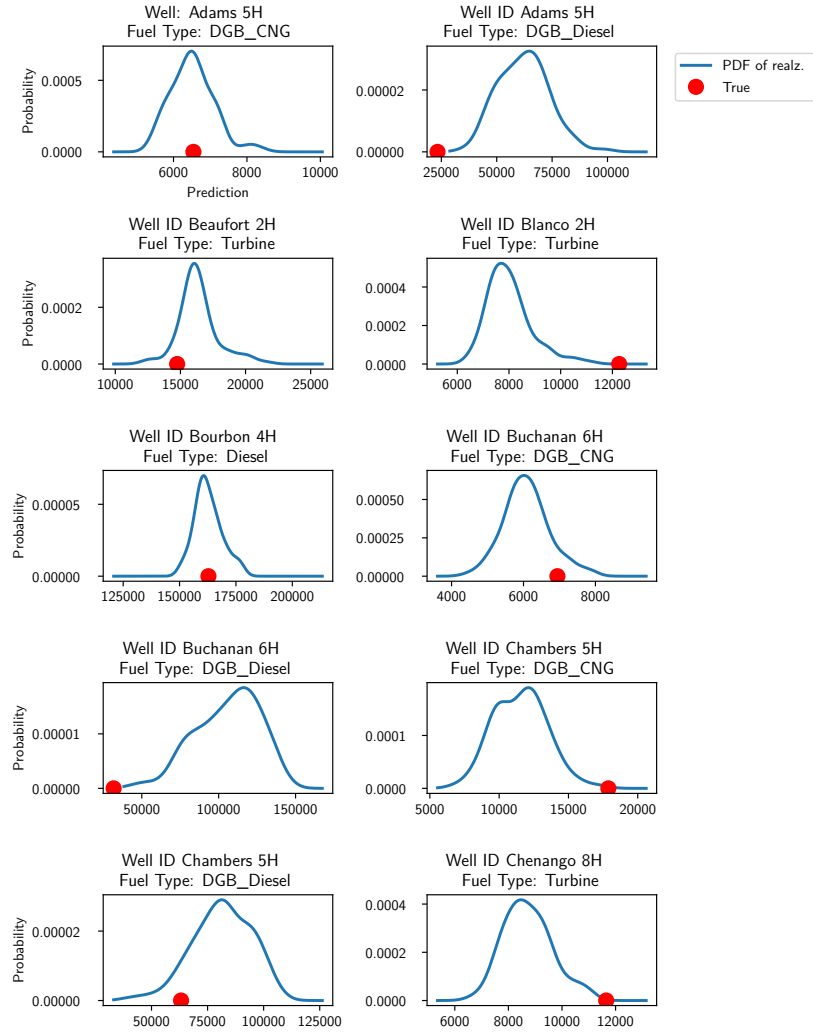

Figure 2: Uncertainty distributions and true values.

Fig 3 shows your team's uncertainty model and actual values for 10 of the predictions.
Figure 3: Goodness Score Plot.

Fig 3 shows your team's goodness score plot for the 50 wells. Your final goodness score is 0.47.

Presentation comments

- nan

- nan

- like the model benefits section

- Good use of mosaic chart

- Difficult to read some graphs. Good conclusions. One issue present with all exec summaries is lack of conclusions and more focus on work done.

- Good use of graphics to demonstrate workflow. Justified use of particular
