# Final Report for Team: The Roaring Kitties

Figure 1: Accuracy.

Fig 1 shows your team's predictions compared to the actual production values at 3 years. The total mean squared error with respect to the true values is 54552.769.
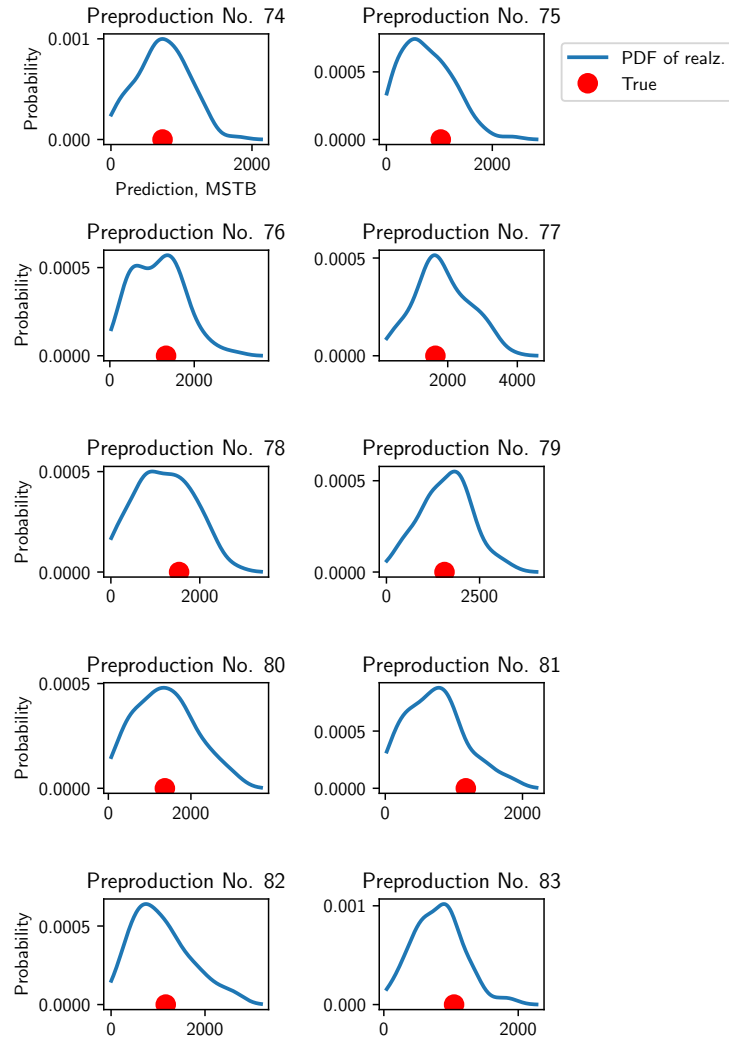

Figure 2: Uncertainty distributions and true values.

Fig 3 shows your team's uncertainty model and the actual production values at 3 years for the 10 preproduction wells.

Figure 3: Goodness Score Plot.

Fig 3 shows your team's goodness score plot for the 10 preproduction wells. Your final goodness score is 0.756.

Presentation comments

- nan

- Energetic group. Great start. Good flow. the handoffs were well done. They were the first group to set a benchmark

- '+vs: Great energy Adi and good presentation overall improve: more details on the dataset - geology/formation etc questions: sampling bias and ability of the model to generalize

- Great presentation. It was concise and explained the model and steps to achieve the results

- Great team co-ordination, excellent presentation.

- Great presentation, passion, teamwork and energy

Code review comments

- o. Concise executive summary and workflow. o. Some of the cells come with no comment, which makes it a bit difficult to follow. o. Would be better to have all required packages in the beginning with a short explanation regarding their roles in this workflow. o. Great visualization and statistical summary!

- Great workflow! Great visualizations!
